Skills

- Languages/Environments: Java, C++, C#, C, Python, HTML, XML
- Tools/Frameworks: Android Studio, Visual Studio, Git, Photoshop

Projects

OverStats – goo.gl/jCbl46

Apr. 2016 - Present

- Android app with 15,000 downloads on Play Store. Rated 3.9 stars. It provides hero stats for Overwatch
- Set up Apache2 on a Linux server to host in-game data, enabling seamless updates using background thread
- Parse json files from a web API to obtain patch notes, catching users up to date on the latest changes

McCree's Watch – goo.gl/73w4yP

Jul. 2016

- Android app with 98,000 downloads on Play Store. Rated 4.8 stars, with 1000 ratings and 500 reviews
- Entertains users through a creative soundboard with material design
- Optimized to play small sound files, which allows users to spam click and play multiple streams in overlap

Diffusion Simulator – goo.gl/eEezIC

Mar. 2016

- Android app that uses a game loop on a dedicated thread to simulate and render collision of particles
- Particles concentrate towards where the user hold on screen, and move randomly when released
